Content Research and Sourcing

Research was conducted to ensure that the content created for Ratshi's Eggs and Chicken website is pertinent to the South African poultry industry and meets the needs of its target audience. The South African Poultry Association (SAPA) served as a primary source for industry information, reinforcing the website's emphasis on poultry products like fresh eggs and chicken (South African Poultry Association, 2026).

The South African Department of Agriculture was consulted to gather insights relevant to the country's agricultural and food production landscape, ensuring the website was appropriately tailored to the South African context (Department of Agriculture, 2026).

This research shaped both the content and layout of the website. Details on poultry products informed the Products page, while insights about customer preferences guided the inclusion of user friendly navigation, detailed product descriptions, pricing, contact information, and an inquiry form. These elements facilitate easy access to business information and communication.

The product prices listed on the website are indicative estimates created for the academic project and should not be considered verified current market prices. Prices may vary based on availability and market conditions, so customers are advised to check prices and availability before making a purchase.

Research and application table.

Source	Information researched	How the research was applied
South African Poultry Association (SAPA).	Insights into South African poultry sector and its products.	Informed the decision to create a website focused on eggs and chicken products.
Department of Agriculture.	Data on South African agriculture and food production.	Ensured that the business concept and website content were tailored to South African environment.
Website usability principles.	Easy navigation and accessible information.	Shaped the five page navigation layout and arrangement of information.
Product research.	Common poultry items, including eggs and chicken.	Informed the development of the products page and products categories.
Customer information needs.	Details about products, pricing and methods to contact the business.	Led to inclusion of product descriptions, estimated prices, contact information and inquiry forms.

Sources Used

South African Poultry Association

The South African Poultry Association provides information and resources relating to the poultry industry in South Africa.

Department of Agriculture

The Department of Agriculture provides official information relating to agriculture and food production in South Africa.
