

RATSHIVHADELO ZWIVHUYA.

PROPOSAL

MODULE CODE: WEDE5020

Organization: Ratshi's Eggs and Chicken

ST10527207

RC BRAAM

1. Overview of the Organization

1.1 Organization Name

Ratshi's Eggs and Chicken

1.2 Background

Ratshi's Eggs and Chicken is a fictional small business in South Africa that specializes in the sale of fresh eggs and high quality chicken products to both households and local enterprises. The goal of the business is to offer customers affordable, top notch poultry products alongside exceptional customer service. It caters to both retail and wholesale clients, thereby serving families, restaurants, caterers, spaza shops, and small businesses.

This business was created to fulfil the increasing demand for fresh poultry in local communities by focusing on food safety standards and providing customers with a good value. Through dependable service, quality merchandise, and competitive pricing, Ratshi's Eggs and Chicken aim to cultivate lasting relationships with its clientele.

The business primarily depends on walk-ins, phone orders, and WhatsApp for taking orders. Recognizing the shift towards online shopping, the business sees the necessity to create a professional website to enhance its online presence, offer product information, and streamline the inquiry process.

The new website will allow customers to browse products, learn about the business, send inquiries, and find contact details at their convenience. This online platform will enhance the business's legitimacy, improve customer interactions, and facilitate growth.

1.3 Vision

To be the trusted source for fresh eggs and quality chicken products in South Africa by delivering excellent customer service and ensuring convenient access through digital technology.

1.4 Mission

To provide safe, fresh, and affordable eggs and chicken products while fostering enduring relationships with customers through quality, reliability, honesty, and superior service.

1.5 Core Values

Quality

Integrity

Customer Satisfaction

Reliability

Accountability

Professionalism

Respect

Food Safety

1.6 Products and Services

Ratshi's Eggs and Chicken offer a variety of poultry products including:

Fresh table eggs

Egg trays (30 eggs)

Live chickens

Dressed whole chickens

Frozen chicken portions

Bulk poultry orders for businesses

Retail and wholesale supply

Future offerings may include local delivery services and online order options via the website.

1.7 Target Audience

The website is designed for:

Households seeking fresh eggs and chicken.

Restaurants and cafes.

Catering services.

Spaza shops and convenience stores.

Schools and community organizations.

Small businesses buying poultry in bulk.

The target market prioritizes freshness, affordability, quality, and convenience. Consequently, the website will provide clear product information, user friendly navigation, and straightforward inquiry options to enhance the customer experience.

2. Website Goals and Objectives

2.1 Website Goal

The main objective for the proposed website is to create a professional online presence for Ratshi's Eggs and Chicken, facilitating an easy way for customers to explore products, ask questions, and connect with the business.

2.2 SMART Objectives

Objectives	Success measure
Increase online visibility	Enhancing website traffic in the first 6 months through search engine optimization and local promotion.
Generate customer inquiries	Achieving at least 40 online product inquiries each month.
Improve customer communication	Offering a responsive online inquiry form and clear contact details to minimize response times
Promote products	Presenting accurate product descriptions, availability and images to assist customers in informed decision making.
Improve accessibility	Creating a responsive website optimized for desktops, tablets and smartphones.

2.3 Key Performance Indicators (KPIs)

The effectiveness of the website will be evaluated through the following KPIs

KPI	Target.
Monthly website visitors	700+ visitors
Online product inquiries	40 enquiries per month
Customer conversion rate	20 new customers
Mobile responsiveness	Fully functional website across major devices
Website loading	Loading time of less than three seconds
Customer satisfaction	Positive feedback from customer and repeat purchases

The website will help fulfil the business's long term goal of expanding its customer base, increasing product inquiries, and enhancing access to reliable information about its poultry products.

3. Current Website Evaluation

3.1 Existing Online Presence

Ratshi's Eggs and Chicken currently lack an official website, relying instead on walk-in traffic, phone calls, WhatsApp messages, and word of mouth for marketing and order management. Although these approaches help maintain relationships with current customers, they limit the ability to attract new clientele and compete with poultry suppliers that have established an online presence.

Today's consumers often prefer to research products, compare prices, and contact businesses online prior to making a purchase. Without a website, potential customers may struggle to find essential information such as product details, operating hours, location, or contact information, leading to missed sales opportunities and stunted growth for the business.

3.2 Strengths

Offers fresh eggs and high quality chicken products.

Caters to both retail and wholesale customers.

Emphasizes affordable pricing and quality.

Delivers friendly, personalized customer service.

Has potential to develop customer loyalty through consistent offerings.

3.3 Weaknesses

Lacks a professional website or online product catalogue.

Customers cannot view products online.

No system for online inquiries or quotes.

Limited digital marketing options.

Business information is not readily accessible at all hours.

Heavily dependent on manual communication methods.

3.4 Improvement Opportunities

Creating a professional website will enhance the organization significantly by:

Establishing a credible online presence that builds customer trust.

Centralizing product information, pricing, and business details.

Allowing customers to submit inquiries anytime via an online form.

Boosting search engine visibility through Search Engine Optimization (SEO).

Facilitating future online orders and home delivery services.

Highlighting weekly specials and seasonal offers.

Reinforcing the brand identity with consistent visual elements and messaging.

4. Suggested Website Features and Functionality

The proposed website will consist of five core pages aimed at delivering a straightforward, informative, and user friendly experience

Web page	Purpose	Features and functionality
Home	Introduce the business and encourage exploration	Hero banner, featured products, Promotions, call to action button.
About us	Provide background on the business.	Company history, Vision, Mission and values.
Products	Showcase available eggs and chicken products.	Products descriptions, images, pricing and promotions.
Order enquiry	Allow customers to request quotes or product info.	Online form for enquiries including customer details and preferred collection date.
Contact us	Offer communication channels and business location.	Phone number, email address, business hours and social media links.

Additional Website Features

To enhance usability and customer interaction, the website will include:

Responsive design for desktops, tablets, and smartphones.

Consistent navigation menu on all pages.

Product image gallery with descriptive alt text.

Search Engine Optimization (SEO) utilizing page titles, meta descriptions, and keywords.

Google Maps integration for business location.

WhatsApp contact button for quick messaging.

Social media links to Facebook, Instagram, and WhatsApp Business.

Customer testimonials for improved credibility.

Contact and inquiry forms with client side validation.

Footer featuring copyright information, quick links, and contact details.

Anticipated Benefits

The new website aims to:

Enhance the organization's professional image.

Increase community awareness of the business.

Provide customers easy access to product information.

Improve communication between the business and its customers.

Generate more inquiries and potential sales.

Support future developments in online ordering and local delivery services.

5. Design and User Experience

5.1 Design Philosophy

The Ratshi's Eggs and Chicken website will feature a sleek, contemporary, and inviting design that embodies freshness, quality, and professionalism. The emphasis will be on showcasing products clearly while facilitating easy navigation for customers to make inquiries. A cohesive layout, appealing visuals, and straightforward navigation will enhance the user experience and encourage repeat visits.

The site will adhere to responsive design standards to ensure optimal functionality across desktops, tablets, and smartphones.

Colour Palette

Colour	Hex code	Purpose
Dark green.	#2E7D32	Symbolize freshness, growth and sustainable farming. Used for headers, navigation and buttons
Golden yellow	#F9A825	Represents eggs, warmth and quality. Used for highlights and action buttons
White	#FFFFFF	Provided a clean , Professional background that enhances readability.
Light green	#F5F5F5	Distinguishes content sections and aids in page organization.

This selected colour scheme reflects the organization's dedication to fresh poultry products while offering an appealing and reliable look.

Typography

Website Element	Font	Purpose
Main headings	Poppins bold	Creates a clear visual hierarchy and draws attention
Subheadings	Poppins semibold	Organizes content into easy to read section
Body text	Arial	Enhances readability across various devices and browsers.

Layout and Design

The website will maintain a uniform layout on every page to enhance usability and uphold a professional look.

Each page will feature:

Company logo

Navigation menu

Main content area

Call to action button

Footer with contact details and copyright information

The homepage will prominently display a large hero image featuring fresh eggs and chicken products, along with a welcoming message and an "Enquire Now" button. Product details will be organized in content cards showcasing images, brief descriptions, and prices where relevant. Visible contact information and inquiry options will be available throughout the site to promote customer engagement.

User Experience (UX) Principles

To ensure a pleasant browsing experience, the website will incorporate the following UX principles:

Clear and consistent navigation

Mobile friendly design

Fast loading times with optimized images

High colour contrast for improved readability

Simple page layouts with sufficient white space

Informative headings and organized content

Accessible inquiry forms with clear labelling

Alternative text for all images to enhance accessibility and SEO

Uniform buttons and icons throughout the site

5.2 Low Fidelity Wireframes.

6. Technical Specifications

The Ratshi's Eggs and Chicken website will be built using contemporary web technologies to ensure it is responsive, secure, and compatible with modern web browsers. This online platform will establish a professional presence, enabling customers to effortlessly browse products and ask questions.

Technical Requirements.

Requirements	speciation	purpose
Operating system.	Windows 11	Provides support for web development tools and software.
Code editor	Visual studio code	Utilized for creating and modifying HTML, CSS and JavaScript files.
Programming languages	HTML5, CSS3 and JavaScript	Essential for building the websites structure and functionality.
Version control	Git and GitHub	Monitors projector modifications and secures backup storage.
Web browsers	Google chrome, Microsoft edge, Mozilla Firefox	Employed for testing compatibility across different browsers.
Domain name	Ratshiegg sandchicken.co.za	Represents a professional
Web hosting	Sharee Linux hosting	Cost effective hosting option for small business website
Images	JPEG, PNG and SVG	Facilitates easy location and communication for customer.
External services	Google Maps and WhatsApp	Allows customers to locate and contact the business easily.

7. Timeline and Milestones.

Week	Activity	Deliverable
Week 1	Conduct business research, gather relevant content, finalize website proposal.	Approved proposal and complete project planning.
Week 2	Create sitemap and wireframes organize, project files and establish HTML structure.	Complete website planning and HTML page development.
Week 3	Apply CSS for design, implement JavaScript for functionality, test the website and prepare for final submission.	Fully operational and responsive website ready for review.

8. Budget

The proposed budget outlined below reflects realistic expenditures associated with developing and maintaining a small business website in South Africa

Budget item	Description	Estimated cost
Domain registration(co.za)	Annual domain registration	R120
Web hosting	Shared hosting package (12 months).	R1200
SSL certificate	Included hosting.	R0
Website design and development.	Design, coding and testing.	R9000
Content creation	Product descriptions, photography.	R1000
Testing and quality assurance.	Browser, Mobile and functionality testing.	R700
Website maintenance.	Website updates and technical support. (12 months)	R2500
Contingency	Unforeseen project expenses.	R1480
Total estimated budget		R16000

Budget Justification

The projected budget is derived from current market rates in South Africa for the development and upkeep of a professional small business website. The costs for domain registration and hosting guarantee the site's year-round availability. Development expenses encompass design, coding, and testing utilizing HTML5, CSS3, and JavaScript. Content creation includes preparing product details and optimizing images for web usage. Maintenance covers routine updates, technical assistance, and security oversight, while the contingency fund allows for adaptability regarding unforeseen project costs.
